

Boost Productivity:

Empower Customer-Facing Employees with Artificial Intelligence

Bold360 is bringing the value of Bold360's AI-first self-service approach to supporting end-customers inside your organization to support your customer-facing employees. Leveraging artificial intelligence to make centralized information more accessible, Bold360 empowers your customer care, in store, and field-based teams to spend more time focusing on the customer and less time finding information to do their jobs. With the power of AI, these employees can become more productive and provide a more humanized, personalized, and consistent customer experience.

Why Choose Bold360?

How Does It Help Employees?

Your customer-facing employees want to provide your customers with good service, but they don't always have the right information immediately accessible. Bold360 breaks down the barriers of siloed knowledge, outdated information, and hard-to-find answers by centralizing processes, procedures, and company information. With A.I. and NLU technologies, employees get instant access to the right information to work more efficiently.

How Does It Help Customers?

Bold360's AI insights fuel faster, more personalized customer interactions by arming front-line employees with relevant and accurate information at their fingertips. And with all employees having easy access to the same knowledge, customers are ensured consistency of answers regardless of the employee or channel of engagement.

REDUCTION IN NEW HIRE ONBOARDING TIME

How Does It Help Businesses?

Industries from retail to financial to hospitality are adopting Bold360 for customer-facing agent assistance to decrease average handle times, reduce training time, bring consistency to messaging, and increase agent satisfaction.. Arming front-line reps with the information they need also decreased the need for internal escalations, lessening the load on higher tier teams. Bold360 also gives knowledge managers real-time insights on common questions and knowledge gaps, so they can continuously improve their content.

How Does Bold360 Work?

Works Alongside All Front-Line Employees

Whether your customer-facing employees are on the floor or behind a desk, streamlining processes saves employees time and makes customer happier. That's why Bold360 has flexible implementations to work with your teams the best way it makes sense for them - from an innovative, smart support portal, to a contextual search widget, or a conversational AI bot. And with Bold360's NLU technology living across any implementation, you can have confidence employees will get the right information, easily and quickly.

Actionable Insights

No other solution makes knowledge management as quick and easy as Bold360. Our Voices Dashboard analyzes questions, displaying the trends in real-time and enabling businesses to immediately resolve gaps in content. Whenever information is changed or added inside the knowledge base, it's immediately available company-wide, so you can be confident that your employees are giving out the most current information available
